B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policy

NOTES TO FINANCIAL STATEMENTS

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company applies the following accounting policies, where applicable:

- 1. Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Investment Analysis Office (SVO Manual).
- 2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
- 3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
- 4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
- 5. Mortgage loans are carried at unpaid principal balances, less impairments as specified by the SVO Manual.
- 6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are based on market expectations. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
- 7. Investments in SCA companies are carried in accordance with SSAP No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88, and the SVO Manual.
- 8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, Joint Ventures, Partnerships and Limited Liability Companies, and the SVO Manual.
- 9. Derivative Securities, refer to Note 8.
- 10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property Casualty Contracts - Premiums. Refer to Note 30.
- 11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and an amount, based on past experience, for losses and loss adjustment expenses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
- 12. The Company did not change its capitalization policy in 2020.
- 13. The Company has no pharmaceutical rebate receivables.

b. The aggregate related fair value of securities with unrealized losses:

Less than 12 months	\$ 0

(5) The Company reviews fixed income securities for impairment on a quarterly basis. Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' equity. If the decline is believed to be "other-than-temporary," and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment.

The company does not participate in term loans; therefore, the company does not have contractual collateral transactions that extend beyond one year from the reporting date. Borrowers of these securities provide collateral equal to or in excess of 102% of the market value of the loaned securities. Acceptable collateral may be in the form of cash or U.S. Government securities, such as Treasuries and Agency Bonds. The market value of the loaned securities is monitored and additional collateral is obtained if the market value of the collateral falls below 102% of the market value of the loaned securities. Additionally, the lending agent indemnifies the Company against borrower defaults. Cash collateral is carried as an asset with an offsetting liability on the balance sheet, as the collateral is unrestricted and the Company can exercise discretion as to how the collateral is invested. The loaned securities remain a recorded asset of the Company. At December 31, 2020 the total fair value of securities on loan was \$1,689,883 with corresponding collateral value of \$1,727,503 of which \$382,429 represents cash collateral that was reinvested.
