NOTES TO FINANCIAL STATEMENTS

Note 1- Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Employers Insurance Company of Wausau (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual*, (APP Manual) and subject to any deviations prescribed or permitted by the State of Wisconsin.

Effective December 31, 1998, the Company entered into a reinsurance treaty with Nationwide Indemnity Company, with Nationwide Mutual Insurance Company as guarantor of the recoverables ceded under that treaty. The Wisconsin Insurance Commissioner has issued a Permitted Practice Decision allowing the guarantee to be used as credit for reinsurance collateral, reducing the provision for reinsurance by \$51,041,000.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

1. Investment grade short-term investments are carried at cost adjusted where appropriate for amortization of premium or discount, or market as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
2. Investment grade bonds are carried at cost adjusted where appropriate for amortization of premium or discount, or market as specified by the SVO Manual.
3. Common stocks are carried at market value except that investments in stocks of subsidiaries and affiliates are carried on the equity basis.
4. Preferred stocks are carried at cost or market in accordance with the SVO Manual.
5. The Company does not own mortgage loans.
6. Mortgage-backed/asset backed securities are stated at amortized value. Prepayment assumptions for single class mortgage-backed/asset backed securities and multi-class securities were obtained from internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all single class mortgage-backed/asset-backed securities and multi-class securities. Non-investment grade mortgage-backed/asset backed securities are stated at the lower of amortized value or fair value.
7. The Company carries its investments in subsidiaries, controlled, and affiliated (SCA) companies in accordance with SSAP No. 46 and the SVO Manual. Schedule D Part 6-Section 1 illustrates the valuation method used for each SCA company.
8. Investments in joint ventures, partnerships, and limited liability companies are carried at the underlying audited GAAP equity value, when available.
9. All derivative instruments are valued consistently with the hedged items.

Note 24- Changes in Incurred Losses and Loss Adjustment Expenses

Reserves for incurred loss and loss adjustment expenses attributed to insured events of prior years has increased by \$98 million from \$2.466 billion to \$2.564 billion during 2002 as a result of re-estimation of unpaid losses and loss adjustment expenses, principally on other liability (asbestos) and personal auto liability lines of insurance. This increase is generally the result of ongoing analysis of recent loss development trends. Original estimates are revised as additional information becomes known regarding individual claims.

A portion of the unfavorable prior year loss development relates to retrospectively rated policies. Additional premium accruals of \$5.92 million have been made, that partially offset this adverse loss development.

NOTES TO FINANCIAL STATEMENTS

Note 29- Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims which emanate principally from general liability policies written prior to the mid- 1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case basis reserves for anticipated losses and bulk reserves for loss adjustment expenses and incurred but not reported losses. The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of expected recoveries from reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectibility of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental losses and loss adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim.

In recent years the Company, as well as the industry generally, has witnessed a significant increase in the number of asbestos claims being filed, due to a number of variables, including more intensive advertising by lawyers seeking asbestos claimants, and the increasing focus by plaintiffs on new and previously peripheral defendants, attempts to broaden the interpretation of compensable loss, and courts expanding the scope of the coverage.

Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based upon historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment.

Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

As a direct result of the significant uncertainties associated with estimating its asbestos and environmental exposures and establishing appropriate levels of reserves, the ultimate liability of the Company for asbestos and environmental exposures may vary materially from the reserves currently recorded. The Company and other industry members have and will continue to litigate the broadening judicial interpretation of policy coverage and the liability issues. If the courts continue to expand the scope of the coverage provided, additional liabilities could emerge for amounts in excess of reserves held. This emergence, as well as the other uncertainties noted above, cannot now be reasonably estimated, but could have a material impact on the Company's future operating results, and financial condition.

The table below summarizes reserve and loss activity for the Company's asbestos and environmental loss and loss adjustment expenses for each of the five most recent calendar years. Gross reserves for both asbestos and environmental are representative of all Liberty pooled companies. Net reserves for asbestos and environmental are allocated based on the Company's Intercompany Reinsurance Agreement as discussed in Note 25.

SCHEDULE P INTERROGATORIES

1. What is the extended loss and expense reserve - direct and assumed - for the following classes? An example of an extended loss and expense reserve is the actuarial reserve for the free-tail coverage arising upon death, disability or retirement in most medical malpractice policies. Such a liability is to be reported here even if it was not reported elsewhere in Schedule P, but otherwise reported as a liability item on Page 3. Show the full reserve amount, not just the change during the current year.

Years in which premiums were earned and losses were incurred	1 Medical Malpractice	2 Other Liability	3 Products Liability
1.01 Prior			
1.02 1993			
1.03 1994			
1.04 1995			
1.05 1996			
1.06 1997			
1.07 1998			
1.08 1999			
1.09 2000			
1.10 2001			
1.11 2002			
1.12 Totals			

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as "Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? Yes [X] No []
3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7.2, below. Are they so reported in this Statement? Yes [] No [X]
4. Do any lines in Schedule P include reserves which are reported gross of any discount to present value of future payments, but are reported net of such discounts on Page 11? Yes [] No [X]

If Yes, proper reporting must be made in the Notes to Financial Statements, as specified in the Instructions. Also, the discounts must be reported in Schedule P - Part 1, Columns 32 and 33.

Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.

Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.

5. What were the net premiums in force at the end of the year for:
(in thousands of dollars)
- | | |
|--------------|-----------|
| 5.1 Fidelity | \$ 222 |
| 5.2 Surety | \$ 28,266 |
6. Claim count information is reported (check one).
If not the same in all years, explain in Interrogatory 7.
- | | |
|------------------|---|
| 6.1 per claim | |
| 6.2 per claimant | X |

- 7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes which have occurred which must be considered when making such analyses? Yes [X] No []
- 7.2 An extended statement may be attached

The ULAE paid by accident year is distributed in proportion to $50\% \times (\text{Direct paid loss}) + 50\% \times (\text{Claims reported in the current calendar year})$.

The ULAE reserve by accident year is distributed in proportion to $(\text{Direct case loss reserves}) + 2 \times (\text{Direct IBNR loss reserves})$.

In WC, the tabular discount rate was changed from 3.5% to 4% in 2000.

Beginning in 2001, the company began to record case ALAE reserves.

Starting in 1999, the company purchased excess of loss reinsurance for voluntary WC.

Starting in Q4 of 2000, the company purchased aggregate stop loss reinsurance for voluntary WC.
