The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded common stocks. The estimated fair value of the equity securities within this category are based on unadjusted market prices provided by the Securities Valuation Office ("SVO") and are thus classified as level 1. The Company holds one equity security, NAMIC, which is not publicly traded. SVO provides a fair value for this equity security. As a result, this security is included in level 1.

Level 2 - Significant Other Observable Inputs: The Company has no assets or liabilities measured and reported at fair value in this category.

Level 3 - Significant Unobservable Inputs: The Company has no assets or liabilities measured and reported at fair value in this category.

Net asset value (NAV): The Company has no assets or liabilities measured and reported in this category.

1. The Company has categorized its assets that are measured at fair value or net asset value into the three-level fair value hierarchy as reflected in the following table. The Company has no liabilities that are measured and reported at fair value. See item 3 below for a discussion of the Company's transfer policy. See item 4 below for a discussion of Level 2 and Level 3 assets.
