(unaudited)

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Liberty Mutual Holding Company Inc. and its subsidiaries (collectively "LMHC" or the "Company"). Certain reclassifications have been made to the 2009 unaudited consolidated interim financial statements to conform with the 2010 presentation. All material intercompany transactions and balances have been eliminated.

The accompanying consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company's principal estimates include (1) unpaid claims and claim adjustment expense reserves, including asbestos and environmental liability reserves and loss sensitive premium attributable to prior years; (2) reinsurance recoverables and associated uncollectible reserves; (3) impairments of the investment portfolio; (4) deferred acquisition costs; (5) valuation of goodwill and intangible assets; and (6) deferred income tax valuation allowance. While management believes that the amounts included in the consolidated financial statements reflect their best estimates and assumptions, these amounts ultimately could be materially different from the amounts currently provided for in the consolidated financial statements.

Adoption of New Accounting Standards

Effective January 1, 2009, the Company adopted new guidance for accounting for other-than-temporary impairments, as codified in FASB Accounting Standards Codification ("ASC") 320, *Investments – Debt and Equity Securities.* This guidance amends the accounting for other-than-temporary impairment of debt securities, requires the establishment of a policy for determining when "credit losses" exist, and provides direction on determining the amount of impairment to be recognized in the statement of income. The adoption of the new guidance resulted in an increase of \$28 (net of tax) to policyholders' unassigned equity and a corresponding decrease to accumulated comprehensive income.

None of the other accounting standards adopted by the Company through the third quarter of 2010 had a material impact on the Company.

Future Adoption of New Accounting Standards

In October 2010, the FASB issued Accounting Standards Update 2010-26, Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts ("ASU 2010-26"). This guidance, as codified in ASC 944, Financial Services - Insurance, specifies that acquisition costs should include only those costs that are directly related to the acquisition or renewal of insurance contracts. All other acquisition related costs - including market research, training, administration, unsuccessful acquisition or renewal efforts, and product development - should be charged to expense as incurred. The Company is required to adopt ASU 2010-26 effective January 1, 2012. The Company is in the process of evaluating the impact of adoption.

None of the other accounting standards issued through the third quarter of 2010 will have a material impact on the Company.

Changes in Reporting Entity

On September 29, 2010, the Company issued a press release announcing its decision to postpone the initial public offering of stock in Liberty Mutual Agency Corporation ("LMAC").

Accumulated Other Comprehensive Income

Other comprehensive income consists principally of unrealized gains and losses on certain investments in debt and equity securities, foreign currency translation adjustments, and pension liability adjustments.

The components of accumulated other comprehensive income, net of related deferred acquisition costs and taxes, are as follows:

	September 30, <u>2010</u>	December 31, 2009
Unrealized gains on securities	\$ 2,195	\$ 1,115
Foreign currency translation & other adjustments	313	269
Accumulated pension liability adjustments	(761)	(856)
Cumulative effect of accounting change	-	(28)
Accumulated other comprehensive income	\$ 1,747	\$ 500

(unaudited)

(2) ACQUISITIONS AND DISPOSITIONS

Safeco Corporation

On September 22, 2008, the Company, through its subsidiaries, acquired all outstanding shares of common stock of Safeco Corporation for a total purchase price of \$6,244. Goodwill and intangible assets (excluding acquired in-force policy intangibles) recognized from the transaction was \$3,603. The results of operations of Safeco Corporation are included in the Company's financial statements subsequent to September 22, 2008.

Integration Activities

As part of the Safeco Corporation acquisition, management has received board authorization to implement certain integration efforts, principally employee and contract terminations. Changes to the restructuring reserves for the nine months ended September 30, 2010 are as follows:

	<u>2010</u>
Balance as of December 31, 2009	\$30
Adjustments to liability	(2)
Payments applied against liability	(7)
Balance as of September 30, 2010	\$21

(3) INVESTMENTS

The following table summarizes the Company's available for sale portfolio by security type as of September 30, 2010 and December 31, 2009:

September 30, 2010	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total securities available for sale	\$55,866	\$2,582	\$(821)	\$57,627

Of the \$696 and \$688 of common stock as of September 30, 2010 and December 31, 2009, respectively, \$286 and \$275, respectively, relates to securities associated with non-guaranteed unit linked products where the policyholder bears the investment risk.

The following table summarizes the Company's allocation of fixed maturities by maturity date as of September 30, 2010 and December 31, 2009:

Fixed Maturities by Maturity Date	As of September 30, 2010 Fair Value	As of December 31, 2009 Fair Value
1 year or less	\$ 2,454	\$ 2,556
Over 1 year through 5 years	15,914	12,678
Over 5 years through 10 years	13,373	10,633
Over 10 years	13,379	15,521
Mortgage and asset-backed securities	14,098	15,051
Total fixed maturities	\$59,218	\$56,439

During 2010, after taking into consideration changes in investment opportunities and its view of the current and prospective business and economic environment, the Company continued to shorten the average duration of its investment portfolio.

The following table summarizes the Company's gross realized gains and losses by asset type for the three and nine months ended September 30, 2010 and 2009, respectively:

	Three Mon		Nine Months Ended September 30,	
Components of Net Realized Investment Gains	2010	2009	2010	2009
Fixed maturities:				
Gross realized gains	\$90	\$73	\$317	\$128

Total	\$(65)	\$2,375	\$(309)	\$2,394

Unrealized losses decreased from \$821 as of December 31, 2009 to \$374 as of September 30, 2010 primarily due to declining Treasury yields and a decrease in credit spreads. Unrealized losses less than 12 months decreased from \$147 at December 31, 2009 to \$65 as of September 30, 2010, a decrease of \$82. Unrealized losses greater than 12 months decreased from \$674 as of December 31, 2009 to \$309 as of September 30, 2010 and accounted for \$365 of the overall decrease in unrealized losses. The Company monitors the difference between the amortized cost and estimated fair value of debt securities to ascertain whether declines in value are temporary in nature. The Company currently does not have the intent to sell these securities and has determined it is not more likely than not that it would be required to sell these fixed income securities before they recover their fair value.

If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' equity. If the decline is believed to be other-than-temporary, and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment. A non-credit impairment loss is recognized in other comprehensive income, net of applicable taxes, as the difference between expected cash flow and fair value. For the three and nine months ended September 30, 2010, the Company recorded \$27 and \$34, respectively, of fixed maturity impairment losses. The Company has concluded that the remaining gross unrealized losses of fixed maturity securities as of September 30, 2010 are temporary.

For equity securities, if the decline is believed to be other-than-temporary, the carrying value of the investment is written down to fair value and a realized loss is recorded. The gross unrealized losses recorded on equity securities as of September 30, 2010 resulted primarily from decreases in quoted fair values from the dates that certain investment securities were acquired as opposed to fundamental changes in the issuer's financial performance and near-term financial prospects. As of September 30, 2010, the Company has concluded that the gross unrealized losses of equity securities are temporary.

As a result of the Company's quarterly other-than-temporary impairment review, total impairment losses for the three and nine months ended September 30, 2010 were \$29 and \$44 respectively, decreases of \$6 and \$166 from the same periods in 2009.

The Company reviews fixed income, public equity securities and private equity and private equity co-investment securities for impairment on a quarterly basis. Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. For fixed income securities where the Company does not expect to recover the entire amortized cost basis of the security, the Company will evaluate whether the other-than-temporary impairment is a credit or a non-credit impairment. The factors considered in making an evaluation for credit versus non-credit other-than-temporary impairment include the following: (a) failure of the issuer of the security to make scheduled interest or principal payments (including the payment structure of the debt security and the likelihood the issuer will be able to make payments that increase in the future), (b) performance indicators of the underlying assets in

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

the security (including default and delinquency rates), (c) vintage, (d) geographic concentration, (e) industry analyst reports, sector credit ratings, and volatility of the security's fair value. In addition, the Company's accounting policy for other-than-temporary impairment recognition requires an other-than-temporary impairment charge be recorded when it is determined the security will be sold or it is more likely than not that the Company will be required to sell the security before recovery of the security's amortized cost basis (all debt securities and certain preferred equity securities) or the Company's intent and ability to hold certain equity securities for a period of time that is sufficient to allow for any anticipated recovery in fair value.

Subsequent to September 30, 2010, the Company has not recognized any additional material other-than-temporary impairments.

Variable Interest Entities

The Company invests in energy, private equity and real estate limited partnerships, and other entities subject to variable interest entity (VIE) analysis under the VIE subsections of ASC 810, Consolidation. The Company analyzes each investment to determine whether it is a VIE, and if so, whether the Company is the primary beneficiary or a significant interest holder based on a qualitative and quantitative assessment. The Company evaluates the design of the entity, the risks to which the entity was designed to expose the variable interest holder and the extent of the Company's control of and variable interest in the VIE. As of December 31, 2009, the Company determined that it was the primary beneficiary of two VIEs in the energy investment sector, and as such, these VIEs were consolidated in the Company's 2009 financial statements. The carrying value of assets and liabilities and the Company's maximum exposure to loss of the consolidated VIEs were immaterial to the Company. These entities were deconsolidated in 2010 upon adoption of the revised guidance in ASC 810 when the Company determined that it did not have a controlling financial interest in the VIEs.

The Company has variable interests in VIEs for which it is not the primary beneficiary and accounts for these VIEs under the equity method in accordance with ASC 323, Investments - Equity Method and Joint Ventures. The VIEs are principally private equity limited partnerships in which the Company has invested as a passive limited partner. The partnerships were deemed to be VIEs because the equity holders as a group lack the power to direct the activities that most significantly impact the respective entity's economic performance. The VIEs generate variability primarily from investment portfolio performance and that variability is passed to equity holders. For these VIEs, the Company absorbs a portion, but not majority, of this variability. The carrying value of assets was \$90 and \$87 as of September 30, 2010 and December 31, 2009, and the Company's maximum exposure to loss was \$119 and \$99 as of September 30, 2010 and December 31, 2009, respectively, for unconsolidated VIEs in which the Company has a significant variable interest. The assets are included in other investments on the consolidated balance sheets. Maximum exposure to loss includes the carrying value and unfunded commitment of the VIE. There is no recourse provision to the general credit of the Company for any VIE beyond the full amount of the Company's loss exposure.

Derivatives

The Company has a Derivative Use Policy, which has been approved by the Investment Committee of each domestic insurance subsidiary that has entered into derivative transactions. Pursuant to the policy, the Company may enter into derivative transactions. As of Setpember 30, 2010, the Company had no material derivative agreements in place. In August 2008, the Company, as part of its risk management program and diversification strategy, entered into two equity swap agreements with a total notional amount of \$335. These contracts matured in January 2009, resulting in realized gains of \$25 for the nine months ended September 30, 2009.

(4) REINSURANCE

The Company is party to retroactive reinsurance arrangements where a significant portion of the consideration was retained on a "funds held" basis and interest is credited on the balance at a weighted average rate of approximately 7.7% annually. These contracts resulted in deferred gains (including experience related profit accruals of \$195) that are amortized into income using the effective interest method over the estimated settlement periods. As of September 30, 2010, and December 31, 2009, deferred gains related to these reinsurance arrangements were \$555 and \$592, respectively, and are included in other liabilities within the consolidated balance sheets. Interest credited to the funds held balances for the three and nine months ended September 30, 2010 was \$30 and \$89, respectively, as compared to \$29 and \$87 for the three and nine months ended September 30, 2010 was \$16 and \$50, respectively, as compared to \$17 and \$50 for the three and nine months ended September 30, 2009, respectively. Reinsurance recoverables related to these transactions, including experience related profit accruals, were \$1,974 and \$2,019 as of September 30, 2010 and December 31, 2009, respectively.

Additionally, the Company has an aggregate stop loss program covering substantially all of Commercial Markets voluntary workers compensation business from the fourth quarter 2000 through the fourth quarter 2002 accident year periods. Under these contracts, losses in excess of a specified loss ratio are reinsured up to a maximum loss ratio and were accounted for as prospective reinsurance at inception. However, due to a material contract change at the January 1, 2002, renewal, premium and loss activity subsequent to December 31, 2001 is now accounted for as retroactive reinsurance for coverage provided from the fourth quarter 2000 through the fourth quarter 2001 covered accident year periods. The retroactive portion of the aggregate stop loss program is included in the amounts disclosed in the preceding paragraph.

In 2007, the Company entered into a multi-year property catastrophe reinsurance agreement with Mystic Re II Ltd. ("Mystic Re II"), a Cayman Islands domiciled reinsurer, to provide \$150 of reinsurance coverage for the Company and its affiliates in the event of a Northeast and/or Florida

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

hurricane event. In the first quarter of 2009, the Company entered into another agreement with Mystic Re II to provide \$225 of additional reinsurance coverage for the Company in the event of a U.S. hurricane or earthquake event. The reinsurance agreements are collateralized through a trust and guarantee received by Mystic Re II from the issuance of catastrophe bonds and provides coverage for hurricane or earthquake-related losses based on industry insured losses as reported by Property Claim Services along with company specific losses on the event. The Company has not recorded any recoveries under these programs. Mystic Re II does not have any other reinsurance in force.

Debt Transactions and In-force Credit Facilities

On May 12, 2010, Liberty Mutual Agency Corporation ("LMAC") entered into a \$200 million unsecured revolving credit facility for general corporate purposes with a syndicate of lenders led by Bank of America, N.A. that terminates three years following the date the facility first becomes available. On November 5, 2010, LMAC and the Ohio Casualty Corporation (OCC) entered into an Amended and Restated Revolving Credit Agreement to allow both LMAC and OCC to be joint and several co-borrowers under the facility, as well as, to change certain covenants to reflect the combined financials of the co-borrowers. The co-borrowers have the ability to trigger the availability of the facility and establish the specific terms of the financial covenants based on then-current combined financials (after giving effect to certain reorganization transactions) at any time before December 31, 2010.

On May 11, 2010, Peerless Insurance Company ("PIC") became a member of the Federal Home Loan Bank of Boston. This membership provides the Company with access to a secured asset-based borrowing with loan maturities of up to 20 years. To date, no funds have been borrowed.

On March 26, 2010, Liberty Mutual Insurance Company ("LMIC") entered into a \$750 three-year committed repurchase agreement for general corporate purposes. To date, LMIC has not used the repurchase agreement. In connection with the new repurchase agreement, LMIC terminated its existing \$750 364-day committed repurchase agreement.

² The par value call date and final fixed rate interest payment date is March 15, 2037, subject to certain requirements.

³ The par value call date and final fixed rate interest payment date is June 15, 2038, subject to certain requirements.

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

On March 26, 2010, PIC entered into a \$250 three-year committed repurchase agreement. The repurchase agreement is guaranteed by LMIC. To date, PIC has not used the repurchase agreement.

On December 14, 2009, Liberty Mutual Group Inc. ("LMGI") entered into a three-year \$400 unsecured revolving credit facility which terminates on December 14, 2012. To date, no funds have been borrowed under the facility. In connection with the new facility, LMGI terminated its \$250 three-year unsecured revolving credit facility and its two revolving credit facilities totaling \$750.

The Company places commercial paper through a program issued by LMGI and guaranteed by LMIC. Effective December 14, 2009, the \$1,000 commercial paper program was reduced to \$400 and is backed by the three-year \$400 unsecured revolving credit facility. As of September 30, 2010, no commercial paper borrowings were outstanding.

On December 10, 2009, Berkeley/St. James Real Estate LLC, a wholly-owned affiliate of the Company, entered into a five-year \$50 mortgage loan secured by the Company's headquarters located at 175 Berkeley Street and 30 St. James Avenue, Boston Massachusetts. The mortgage loan has limited recourse to Berkeley/St. James Real Estate LLC in certain instances and LMGI guarantees those limited recourse obligations.

On March 11, 2009, LMIC became a member of the Federal Home Loan Bank of Boston. This membership provides LMIC with access to a secured asset-based borrowing with loan maturities of up to 20 years. To date, no funds have been borrowed.

On June 9, 2006, Liberty Mutual Insurance Europe Limited entered into a \$20 revolving loan facility. The facility is available to provide working capital to the Company's international operations. The revolving loan facility is guaranteed by LMIC. As of September 30, 2010, \$2 was outstanding under the facility.

Payments of interest and principal of the surplus notes are expressly subordinate to all policyholder claims and other obligations of LMIC. Accordingly, interest and principal payments are contingent upon prior approval of the Commissioner of Insurance of the Commonwealth of Massachusetts.

Capital lease obligations as of September 30, 2010 and December 31, 2009, were \$100 and \$105, respectively, and are included in other liabilities in the accompanying consolidated balance sheets. In 2008, the Company entered into an arrangement to sell and leaseback certain furniture and equipment. The weighted average interest rate on the lease is 4.88%. The transactions are accounted for as capital leases.

(6) ASBESTOS AND ENVIRONMENTAL

The Company's asbestos and environmental (A&E) reserves for unpaid claims and claim adjustment expenses, net of reinsurance and including uncollectible reinsurance, decreased \$306 from \$1,580 as of December 31, 2009 to \$1,274 as of September 30, 2010. The decrease is primarily due to a payment on a large settlement during the period.

In the third quarter of 2009, the Company completed its biennial ground-up asbestos reserve study. The study was completed by a multi-disciplined team of internal claims, legal, reinsurance and actuarial personnel, and it included all major segments of the Company's direct, assumed, and ceded asbestos claims. As part of the internal review, potential exposures of certain policyholders were individually evaluated using the Company's proprietary stochastic model, which is consistent with published actuarial papers on asbestos reserving. Among the factors reviewed in depth by the team of specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, types of injury, state jurisdictions, legal defenses, and reinsurance potential. The remaining policyholders (those with less potential exposure) were evaluated using aggregate methods that utilized information and experience specific to these insureds. The study resulted in an increase to reserves of \$383. The previous comprehensive study was completed in 2007. Between comprehensive studies, the Company monitors asbestos activity to determine whether or not any adjustment to reserves is warranted. The Company completed its annual study on the environmental claims liability, resulting in immaterial adjustments to held reserves.

(7) INCOME TAXES

The income tax provision is calculated under the liability method. The Company recognizes deferred income tax assets and liabilities for the expected future tax effects attributable to temporary differences between the financial statement and tax return bases of assets and liabilities based on enacted tax rates and other provisions of the tax law. The effect of a change in tax laws or rates on deferred tax assets and liabilities is recognized in income in the period in which such change is enacted. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that all or some portion of the deferred tax assets will not be realized. Deferred tax positions are not established for adjustments arising from foreign operations whose earnings are considered to be permanently reinvested.

The Company's effective tax rate differs from the Federal statutory rate of 35% principally due to tax-exempt investment income, foreign taxes and the elimination of the tax benefit associated with Medicare Part D subsidies.

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

Balance at December 31, 2009	\$221
Additions based on tax positions related to current year	6
Additions for tax positions of prior years	24
Settlements	(1)
Balance at September 30, 2010	\$250

Included in the tabular roll forward of unrecognized tax benefits is interest in the amount of \$90 and \$85 as of September 30, 2010 and December 31, 2009, respectively.

Included in the balance as of September 30, 2010 is \$150 related to tax positions that would impact the effective tax rate.

The Company recognizes interest and penalties related to unrecognized tax benefits in Federal, state, and foreign income tax expense. For the nine months ended September 30, 2010 and 2009, respectively, the Company recognized approximately \$5 and \$15 of interest and penalties, respectively. The Company had approximately \$88 and \$82 of interest and penalties accrued as of September 30, 2010 and December 31, 2009, respectively.

(8) FAIR VALUE MEASUREMENT

The Company's estimates of fair value are based on the framework established in ASC 820, Fair Value Measurements and Disclosures. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach incorporating prices and other relevant information generated by market transactions involving identical or comparable securities. The Company also considers the impact of a significant decrease in trading volume and level of activity for an asset when compared with normal activity to identify transactions that are not orderly. The majority of the fair value estimates for the Company's investment portfolio are obtained from third party pricing services.

The level assigned to each security is based on the Company's assessment of the transparency of the inputs used in the valuation of each asset type at the measurement date. Valuations categorized as Level 1 reflect quoted prices for identical assets in active markets. Securities classified as Level 2 utilize observable inputs including interest rates, yield curves, prepayment speeds, and default rates to estimate fair value. Holdings classified as Level 3 utilize unobservable inputs and incorporate management's assumptions and judgments in estimating fair value. Securities are classified based on the lowest level of input that is significant to the fair value measurement. Transfers between levels are recognized at the end of each reporting period. The hierarchy requires the use of market observable information when available for assessing fair value. The following tables summarize the Company's assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2010 and December 31, 2009, respectively, along with a brief description of the valuation technique for each type of asset and liability:

The Company did not have significant transfers between Levels 1 and 2 for the nine months ended September 30, 2010.

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

Fixed maturities and short-term securities are recorded at fair value in the Company's financial statements. U.S. government securities are valued based on unadjusted market prices and are classified as Level 1. The fair values of securities issued by U.S. government agencies, mortgage and asset-backed securities, securities issued by state and municipal governments, corporate bonds, and securities issued by foreign governments are estimated utilizing models that incorporate observable inputs such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, option adjusted spreads, two sided markets, benchmark securities, bids, offers, and published market research reference data such as market indicators and economic events. The majority of the Company's fixed income portfolio is classified as Level 2. The fair value of fixed maturity securities that are not provided by the pricing services are estimated by management using various matrix pricing techniques and are classified as Level 3.

Equity securities include public and private common and preferred stock. Public common stocks with fair values based on quoted market prices in active markets are classified as Level 1. Public common stocks in markets that are less active and public preferred stock have been classified as Level 2. Equity securities that are not actively traded on an exchange are valued using models that incorporate observable inputs such as reported trades, broker/dealer quotes, benchmark securities, bids, offers, and published market research reference data such as market indicators and economic events. Private common stock, private preferred stock, and other equities securities that are not valued by the pricing services are estimated by management using various matrix pricing techniques and are classified as Level 3.

Other investments include primarily international loans, foreign cash deposits, and equity investments in privately held businesses. International loans and cash deposits are primarily valued using quoted prices for similar instruments in active markets; these assets are categorized as Level 2 of the fair value hierarchy. Equity investments in privately held businesses are valued using internal management estimates; they are categorized as Level 3 of the hierarchy. Limited partnership investments, which represent the remainder of the other investment balance on the consolidated balance sheet, are not subject to these disclosures and therefore are excluded from the above table.

Separate account assets, which primarily consist of fixed maturity and equity securities, are measured based on the methodologies discussed above. The activity in separate account assets is offset by an equal amount for separate account liabilities, which results in a net zero impact for the Company.

Other assets primarily consist of fixed maturities, short-term investments, and equity securities of captive companies sponsored by the Company. These assets are measured based on the methodology for individual securities as discussed above.

Life insurance obligations include certain variable annuity contracts which contain guaranteed minimum income benefits that contain embedded derivatives which are bifurcated from the host contract and carried at fair value. The measurements on these embedded derivatives is computed on a recurring basis using assumptions predominately classified as Level 3 (significant unobservable) inputs. While some inputs are observable in the market such as risk free rates, volatility and historical equity returns, the underlying future policyholder behavior inputs are highly unobservable. These assumptions include mortality, lapse, and the underlying take-up rate with regard to annuitization.

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

For fixed maturities and equity securities, transfers into Level 3 were \$65 and transfers out of Level 3 were (\$76) during the nine months ended September 30, 2010. These transfers were primarily due to re-evaluation of the observability of pricing inputs.

There were no material unrealized gains (losses) for the period included in earnings attributable to the fair value relating to assets and liabilities classified as Level 3 that are still held as of September 30, 2010.

For the nine months ended September 30, 2010, there were no impairments recognized for items measured at fair value on a nonrecurring basis.

The Company has not applied ASC 820 to non-financial assets and liabilities.

(9) BENEFIT PLANS

The net benefit costs for the three months ended September 30, 2010 and 2009, include the following components:

			Supplei	mental		
			Pens	sion	Postreti	rement
Three months ended September 30,	Pension E	Bene	fits *	Benefits		
-	2010	2009	2010	2009	2010	2009
Components of net periodic benefit costs:						
Service costs	\$ 49	\$ 50	\$ 2	\$ 3	\$ 6	\$ 7
Interest costs	72	68	5	4	12	11
Expected return on plan assets	(65)	(62)	-	-	-	(1)
Settlement charge	34	1	-	-	-	-
Amortization of unrecognized:						
Net loss	12	14	2	2	-	-
Prior service cost	1	2	1	1	(1)	(1)
Net transition (assets)/obligation	(1)	(2)	-	-	1	3
Net periodic benefit costs	\$ 102	\$ 71	\$ 10	\$ 10	\$ 18	\$ 19

^{*} The Company sponsors non-qualified supplemental pension plans to restore to selected highly compensated employees the pension benefits to which they would have been entitled under the Company's U.S. tax qualified, defined benefit pension plan had it not been for limits imposed by the Internal Revenue Code. The supplemental plans are unfunded.

The net benefit costs for the nine months ended September 30, 2010, and 2009, include the following components:

Nine months ended September 30,	Pension 1	Benefits	Per	emental nsion efits *	Postretirement Benefits		
	2010	2009	2010	2009	2010	2009	
Components of net periodic benefit costs:

Net periodic benefit costs	\$ 239	\$ 209	\$ 31	\$ 32	\$ 60	\$ 61	

^{*} The Company sponsors non-qualified supplemental pension plans to restore to selected highly compensated employees the pension benefits to which they would have been entitled under the Company's U.S. tax qualified, defined benefit pension plan had it not been for limits imposed by the Internal Revenue Code. The supplemental plans are unfunded.

Notes to Consolidated Financial Statements

(dollars in millions)

(unaudited)

The Company has contributed \$250 to the qualified plans as of September 30, 2010 and expects to additionally contribute approximately \$1. The Safeco Cash Balance Plan was terminated effective May 6, 2010. As a result, all assets of the Plan were distributed to participants by September 3, 2010, at which time the pension benefit obligation of \$153 disclosed at year end 2009 was eliminated from the Company's books.

(10) COMMITMENTS AND CONTINGENT LIABILITIES

Various lawsuits against the Company have arisen in the normal course of business. Contingent liabilities arising from litigation, income taxes, and other matters are not considered material in relation to the financial position of the Company.

The Company is currently in coverage litigation with Kentile Floors, Inc. a former manufacturer of floor tile products, some of which contained asbestos. In November 1992, Kentile filed a voluntary petition for bankruptcy relief under Chapter 11 (Reorganization) of the Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of New York, and Metex Manufacturing Corporation ("Metex") emerged from the Chapter 11 Bankruptcy proceeding as the "Reorganized Debtor." Metex claims it has rights to the policies issued to Kentile, but this issue has not yet been resolved by the bankruptcy court.

In 2008, certain excess insurers of Kentile initiated a declaratory judgment action against Kentile, Metex and the other insurers of Kentile, including the Company, in state court in New York seeking, among other relief, products coverage without aggregate limits from the Company.

The Company intends to vigorously defend its position in this coverage litigation, including opposing any argument that the Kentile policies do not contain aggregate limits for products claims. Management believes that the ultimate liability, if any, to Metex will not be resolved for at least one year and very likely may not be known for several years. In the opinion of management, the outcome of these pending matters is difficult to predict and an adverse outcome could have a material adverse effect on the Company's business, financial condition and results of operation.

As of September 30, 2010, the Company had unfunded commitments in traditional private equity partnerships, real estate, and energy and other of \$993, \$431, and \$1,219, respectively. As of September 30, 2010, the Company had commitments to purchase various residential mortgage-backed securities at a cost and fair value of \$18 and various corporate and municipal securities at a cost and fair value of \$698.

(11) SUBSEQUENT EVENTS

On November 3, 2010, the Company and Videocon Industries Ltd. announced their mutual intent to establish a non-life insurance joint venture company in India to provide personal and commercial insurance products through a range of distribution channels. The two companies intend to begin the licensing application process for the new company before the end of this year.

Management has assessed material subsequent events through November 5, 2010, the date of the third quarter 2010 earnings release.
