NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Safeco Lloyds Insurance Company (the Company) have been prepared on the basis of accounting practices prescribed or permitted by the Washington Insurance Department.

The state of Texas requires insurance companies domiciled in the state of Texas to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the Texas Insurance Department.

The difference between Texas prescribed practices and NAIC statutory accounting practices (NAIC SAP) which affect the Company is due to certain investments which the Company has non-admitted for non-compliance with state specific investment limitations. The effect of this difference is a reduction in total admitted assets and surplus, with no effect to net income. Reconciliation of the Company’s net income and policyholders’ surplus between NAIC SAP and practices prescribed by the State of Texas is as follows:

Description	December 31, 2008	December 31, 2007
1. Net income, TX basis	\$ 485,187	\$ 538,157
2. Effect of TX prescribed practices	-	-
3. Effect of TX permitted practices	-	-
4. Net income, NAIC SAP basis	\$ 485,187	\$ 538,157

Description	December 31, 2007	December 31, 2007
5. Policyholders’ surplus, TX basis	\$ 10,378,756	\$ 9,462,274
6. Effect of TX prescribed practices		
Non-admitted bond	1,012,514	1,443,811
7. Effect of TX permitted practices	-	-
8. Policyholders’ surplus, NAIC SAP basis	\$ 11,391,270	\$ 10,906,085

B. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amount reported in these financial statements and notes. Actual results could differ from those estimates.

C. Accounting Policies

Insurance premiums are included in income as they are earned over the term of the respective insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and assumed business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, such as sales commission, are charged to operations as incurred. Expenses are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest and dividends. Interest is recognized on an accrual basis and dividends are recorded on the date of record. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other-than-temporary.

In addition, the Company uses the following accounting policies:

- Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or market as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office.
- Bonds that are designated highest-quality and high-quality (NAIC designations 1 and 2, respectively) are stated at cost or amortized cost; all other bonds are stated at the lower of amortized cost or fair value. The fair values of investments in bonds are based on quoted market prices by third-party organizations when available or NAIC investment values. NAIC investment values are determined using the *Valuations of Securities* manual published by the NAIC Securities Valuation Office (SVO). For bonds not actively traded, fair values are estimated using values obtained from independent pricing services, or in the case of private placements, are estimated by discounting the expected future cash flows using current market rates applicable to the coupon rate, credit, and maturity of the investments. Amortization of bond premium and discount is calculated using the effective-yield method. The retrospective-adjustment method is used to value all mortgage-backed and asset-backed securities. Using this method, anticipated prepayments are considered when determining the amortization of discount or premium for loan-backed bonds. Prepayment assumptions are obtained from dealer survey values or internal estimates and are consistent with the current interest rate and economic environment.
- Unaffiliated common stocks are stated at fair value and the related net unrealized capital gains (losses) are reported in unassigned surplus along with an adjustment for federal income taxes. Fair values of investments in common stocks are based on quoted market prices by third-party organizations when available or NAIC investment values. For stocks that are not actively traded, estimated fair values are based on values of issues with comparable yield and quality.

10. Premium Deficiency Reserve

The Company anticipates investment income when evaluating the need for a premium deficiency reserve, in accordance with SSAP No. 53, *Property Casualty Contracts Premiums*.

11. Method of establishing loss and LAE reserves

Unpaid loss and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions, estimates and judgments. While we believe the amount is reasonable, the ultimate liability is uncertain and may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined. In September 2008, the Company and its affiliated property and casualty companies changed the reserve methodology and began discounting workers' compensation reserves for unpaid losses using a tabular discount on the long-term annuity portion of certain workers' compensation claims. See Note 31 for detail.

Asbestos:

Estimating loss reserves for asbestos claims requires more judgment than for our other lines of business. This is primarily because past claim experience may not be representative of future claims.

Several factors make it difficult to predict future asbestos claim payments. They include:

- Insufficient data
- Inherent risk of major litigation
- Diverging legal interpretations
- Regulatory actions
- Legislative actions
- Increases in bankruptcy proceedings
- Non-impaired claimants being allowed to make claims
- Efforts by insureds to seek coverage interpretation not subject to aggregate limits.

Changes in these factors could result in future asbestos claims payments that are significantly different from those currently predicted.

In estimating our loss reserves for asbestos claims, we:

- Consider applicable law and coverage litigation
- Analyze claim statistics and trends
- Review industry information to test the reasonableness of our reserves
- Do not consider ongoing Congressional reform efforts.

Some asbestos-related claims are subject to non-product liability coverage rather than product liability coverage. Non-product liability coverage may not be subject to policy aggregate limits, resulting in higher asbestos claims payments and related expenses.

## NOTES TO FINANCIAL STATEMENTS

### Environmental and Other Toxic Tort Claims:

The volatility of actuarial estimates of liabilities for environmental and other toxic tort claims is often greater than that of other exposures. This is due to several factors including:

- Insufficient data
- Changes in the number and types of defendants involved with these claims
- Unresolved legal issues including existence of coverage, definition of ultimate damages and final allocation of damages due from the financially responsible parties.

In light of these factors, we estimate loss reserves for environmental and other toxic tort claims including consideration of:

- Claim statistics and trends
- Directional trends in survival ratios
- Applicable law and coverage litigation
- Industry information.

GENERAL INTERROGATORIES  
PART 2 - PROPERTY & CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss:  
The Company purchases a Workers Compensation Excess of Loss reinsurance treaty and a Workers Compensation Catastrophe Reinsurance treaty to protect itself from excessive loss in the event of a catastrophe under a Workers Compensation contract

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:  
The Company estimates its catastrophic loss PML by having Aon Risk Services run 3 separate models. The Company receives PML estimates for earthquake (incl fire following and sprinkler leakage), hurricane and tornado/hail. Based on these models, the largest PML would involve a CA earthquake event.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?

The Company utilizes catastrophe reinsurance to protect itself from an excessive loss arising from property exposures
