NOTES TO FINANCIAL STATEMENTS

Note 1- Summary of Significant Accounting Policies

A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Wisconsin, the accompanying financial statements of Employers Insurance Company of Wausau (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("APP Manual").

Effective December 31, 1998, the Company entered into a reinsurance treaty with Nationwide Indemnity Company, with Nationwide Mutual Insurance Company as guarantor of the recoverables ceded under the treaty. The Wisconsin Insurance Commissioner has issued a Permitted Practice Decision allowing the guarantee to be used as credit for reinsurance collateral, reducing the provision for reinsurance by \$76,378,993.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

1. Investment grade short-term investments are carried at cost adjusted where appropriate for amortization of premium or discount, or market as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
2. Investment grade bonds are carried at cost adjusted where appropriate for amortization of premium or discount, or market as specified by the SVO Manual.
3. Common stocks are carried at market value except that investments in stocks of subsidiaries and affiliates are carried on the equity basis.
4. Preferred stocks are carried at cost or market in accordance with the SVO Manual.
5. The Company does not own mortgage loans.
6. Mortgage-backed/asset backed securities are stated at amortized value. Prepayment assumptions for single class mortgage-backed/asset backed securities and multi-class securities were obtained from internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all single class mortgage-backed/asset-backed securities and multi-class securities. Non-investment grade mortgage-backed/asset backed securities are stated at the lower of amortized value or fair value.
7. The Company carries its investments in subsidiaries, controlled, and affiliated (SCA) companies in accordance with SSAP No. 46 and the SVO Manual. Schedule D Part 6-Section 1 illustrates the valuation method used for each SCA company.
8. Investments in joint ventures, partnerships, and limited liability companies are carried at the underlying audited GAAP equity value, when available.
9. The Company has no derivative instruments.
10. The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property-Casualty Contracts - Premiums*.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.

Note 2- Accounting Changes and Correction of Errors

- A. There were no material changes in accounting principles or corrections of errors during the year.
- B. The Company prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Wisconsin. Effective January 1, 2001, the Wisconsin Insurance Commissioner required that insurance companies domiciled in Wisconsin prepare their statutory-basis financial statements in accordance with the NAIC APP Manual, effective January 1, 2001, subject to any deviations prescribed or permitted by the Wisconsin Insurance Commissioner.

NOTES TO FINANCIAL STATEMENTS

Accounting changes adopted to conform to the provisions of the NAIC APP Manual, effective January 1, 2001, are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods. As a result of these changes, the Company reported a change of accounting principle, as an adjustment that decreased unassigned funds (surplus) by \$60,978,527 as of January 1, 2001. Included in this total adjustment are the following items:

Note 25 - Changes in Incurred Losses and Loss Adjustment Expenses

Reserves for incurred loss and loss adjustment expenses attributed to insured events of prior years has increased during 2003 as a result of rising loss development trends in commercial lines including workers' compensation, automobile, and asbestos and environmental. Original estimates are revised as additional information becomes known regarding individual claims.

A portion of the unfavorable prior year loss development relates to retrospectively rated policies. Additional premium accruals of have been made, that partially offset this adverse loss development.

The amount of unrecorded loss contingencies related to the purchased annuities was \$256,364,214 as of December 31, 2003.
- B) A summary of purchased structured settlement annuities exceeding 1% of policyholders' surplus and whereby the company has not obtained a release of liability from the claimant is as follows:

Note 30 – Premium Deficiency Reserves

As of December 31, 2003, the Company had no liabilities related to premium deficiency reserves. The Company considers anticipated investment income when calculating its premium deficiency reserves.

Note 31- High Dollar Deductible Policies

As of December 31, 2003, the amount of reserve credit recorded for high dollar deductible policies on unpaid losses was \$331,457,466 and the amount billed and recoverable on paid claims was \$37,666,116.

Note 32- Discounting of Liabilities for Unpaid Losses and Unpaid Loss Adjustment Expenses

For Workers Compensation, the Company discounts its reserves for unpaid losses using a tabular discount on the long-term annuity portion of certain workers compensation claims. The tabular discount is based on Unit Statistical Plan tables as approved by the respective states at an annual discount rate of 4.0%. The December 31, 2003, liabilities include \$549,264,373 of liabilities carried at a discounted value of \$340,145,618 representing a discount of \$209,118,755.

For Group Accident and Health, the Company discounts its reserves for unpaid losses using a tabular discount on the long-term disability portion of some Group Accident and Health claims. The tabular discount is based on the 1987 Commissioners Group Disability Table (CGDT) at annual discount rates varying from 5.00% to 6.00%. The December 31, 2003, liabilities include \$107,052,408 of liabilities carried at a discounted value of \$75,558,482 representing a discount of \$31,493,926.

For all other lines, the Company does not discount its reserves for unpaid losses and loss adjustment expenses.

Note 33 - Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims which emanate principally from general liability policies written prior to the mid- 1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case basis reserves for anticipated losses and bulk reserves for loss adjustment expenses and incurred but not reported losses. The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of expected recoveries from reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

Upon their de-affiliation from the Nationwide Group and re-affiliation with the Liberty Mutual Insurance Company, EICOW, Wausau Business Insurance Company ("WBIC"), Wausau General Insurance Company ("WGIC"), and Wausau Underwriters Insurance Company ("WUIC") entered into ceded reinsurance contracts whereby Nationwide Indemnity Company assumed full responsibility for obligations on certain policies with effective dates prior to January 1, 1986,

NOTES TO FINANCIAL STATEMENTS

including all asbestos and environmental exposures.

Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectibility of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental losses and loss adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim.

In recent years the Company, as well as the industry generally, has witnessed a significant increase in the number of asbestos claims being filed, due to a number of variables, including more intensive advertising by lawyers seeking asbestos claimants, and the increasing focus by plaintiffs on new and previously peripheral defendants, attempts to broaden the interpretation of compensable loss, and courts expanding the scope of the coverage.

Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based upon historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment.

In the third quarter of 2003, the Company completed a ground-up study of asbestos reserves, focusing on the implications of claim and litigation trends and other significant developments, with special attention to major asbestos defendants and non-products claims alleging that the Company's coverage obligations are not subject to aggregate limits. In addition, as part of this comprehensive ground-up study, Company management expanded its historical methodology in response to recent trends. This included further categorization of policyholders, conducting an examination of recent claim activity from policyholders reporting claims for the first time, and a review of past settlements. As a result of the ground-up study, the Company increased net loss reserves by \$52 million in 2003 including a provision for uncollectible reinsurance of \$25 million. As payments are made, the allowance is reclassified to other expenses and offset to the corresponding paid loss recoverable allowance.

Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

As a direct result of the significant uncertainties associated with estimating its asbestos and environmental exposures and establishing appropriate levels of reserves, the ultimate liability of the Company for asbestos and environmental exposures may vary materially from the reserves currently recorded. The Company and other industry members have and will continue to litigate the broadening judicial interpretation of policy coverage and the liability issues. If the courts continue to expand the scope of the coverage provided, additional liabilities could emerge for amounts in excess of reserves held. This emergence, as well as the other uncertainties noted above, cannot now be reasonably estimated, but could have a material impact on the Company's future operating results, and financial condition.

The table below summarizes reserve and loss activity for the Company's asbestos and environmental loss and loss adjustment expenses for each of the five most recent calendar years. Gross reserves for both asbestos and environmental are representative of all Liberty pooled companies. Net reserves for asbestos and environmental are allocated based on the Company's Intercompany Reinsurance Agreement as discussed in Note 26.

SCHEDULE P INTERROGATORIES

1. What is the extended loss and expense reserve - direct and assumed - for the following classes? An example of an extended loss and expense reserve is the actuarial reserve for the free-tail coverage arising upon death, disability or retirement in most medical malpractice policies. Such a liability is to be reported here even if it was not reported elsewhere in Schedule P, but otherwise reported as a liability item on Page 3. Show the full reserve amount, not just the change during the current year.

Years in which premiums were earned and losses were incurred	1 Medical Malpractice	2 Other Liability	3 Products Liability
1.01 Prior			
1.02 1994			
1.03 1995			
1.04 1996			
1.05 1997			
1.06 1998			
1.07 1999			
1.08 2000			
1.09 2001			
1.10 2002			
1.11 2003			
1.12 Totals			

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as "Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? Yes [X] No []
3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement? Yes [] No [X]
4. Do any lines in Schedule P include reserves that are reported gross of any discount to present value of future payments, but are reported net of such discounts on Page 10? Yes [] No [X]

If Yes, proper reporting must be made in the Notes to Financial Statements, as specified in the Instructions. Also, the discounts must be reported in Schedule P - Part 1, Columns 32 and 33.

Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.

Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.

5. What were the net premiums in force at the end of the year for:
(in thousands of dollars)
- | | |
|--------------|-----------|
| 5.1 Fidelity | \$ 643 |
| 5.2 Surety | \$ 20,480 |
6. Claim count information is reported (check one).
If not the same in all years, explain in Interrogatory 7.
- | | |
|------------------|-------|
| 6.1 per claim | _____ |
| 6.2 per claimant | X |

- 7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes which have occurred which must be considered when making such analyses?

Yes [X] No []

- 7.2 An extended statement may be attached

The AO LAE paid by accident year is distributed in proportion to 50%(Direct paid loss) + 50%(Claims reported in the current calendar year).

The AO LAE reserve by accident year is distributed in proportion to (Direct case loss reserve) + 2x(Direct IBNR loss reserve).

Reserve data as of the end of 2001 and 2002 was revised to adopt the current policy of no direct case DCC LAE reserves.

The acquisition of the Prudential companies required recasting history for those lines Prudential Property and Casualty Company wrote.

Foreign exchange rate changes caused \$24 million (pool total) of the unusual one-year development in Private Passenger Auto Liability/Medical.

Beginning in 1999, the Company made major changes in its ceded WC reinsurance program.
